

# ⚠️ LPG SAFETY GUIDELINES

## Stay Safe with Baraka Gas

### HOW TO DETECT GAS LEAKS

#### SMELL

Rotten eggs odor  
(added for detection)

#### LISTEN

Hissing sound  
near cylinder/hose

#### LOOK

Bubbles in soapy water  
at connections

### ✓ ALWAYS DO

- ✓ Store cylinders upright in ventilated areas
- ✓ Turn off gas when not in use
- ✓ Keep 1 meter away from heat sources
- ✓ Check for leaks monthly with soapy water
- ✓ Replace hoses every 2 years
- ✓ Use certified regulators and equipment
- ✓ Keep fire extinguisher accessible
- ✓ Ensure good kitchen ventilation

### ✗ NEVER DO

- ✗ Use matches/lighters to detect leaks
- ✗ Store cylinders near flames or heat
- ✗ Swap gas with valve open

- ✗ Store in basements or enclosed spaces
- ✗ Ignore gas smell - report immediately
- ✗ Drop, throw, or roll cylinders
- ✗ Use damaged or rusty cylinders
- ✗ Modify or repair cylinders yourself

## SOS IF YOU SMELL GAS

1. **DON'T PANIC** - No flames, no switches
2. **TURN OFF** cylinder valve immediately
3. **VENTILATE** - Open all doors and windows
4. **EVACUATE** - Leave the area if smell persists
